

SAI SUBRAHMANYAM MAHADASA

New York, NY | +1 660-528-5209 | saimahadasa1999@gmail.com | [LinkedIn](#) | [Portfolio](#)

Senior Full Stack Engineer | 5+ Years | Python, Devops, Django, Gen AI, RAG, AWS, React

WORK EXPERIENCE

Perky (Perspective Partners LLC) | Client: Lincoln Financial Group

Senior AI Engineer

Mar 2024 – Present
New York, NY | Hybrid

- Built end-to-end full stack features for a financial analytics platform using **React**, TypeScript, Python Django, GraphQL API, and PostgreSQL, delivering 25+ data-intensive dashboards with complex filtering, drilldown navigation, and real-time aggregations.
- Managed **Kubernetes** deployments on AWS EKS with rolling updates, pod autoscaling, and health probes maintaining 99.9% uptime across containerized production services handling 20K+ records per request.
- Engineered python REST API services with PostgreSQL enforcing RBAC, JWT/OAuth, and audit logging for enterprise API governance.
- Containerized with Docker, deployed to **AWS** (EC2, S3, RDS), and automated GitLab CI/CD, achieving 40% faster release cycles.
- Leveraged GitHub Copilot and Claude AI to accelerate feature development, consistently reviewing and refining AI-generated code.

Rapid Innovation | Client: ICICI Home Finance

Software Developer

Feb 2022 – Jun 2023
Noida, India

- Engineered RESTful and GraphQL APIs using **Python Django** secured with OAuth 2.0, powering financial analytics dashboards.
- Containerized full stack applications using multi-stage **Docker** builds across development, staging, and production environments, cutting mean deployment time from 6 hours to under 45 minutes with consistent environment parity.
- Optimized PostgreSQL execution plans and **Redis** cache strategies, improving platform performance by 35% and cutting dashboard load from 8s to 2s.
- Enforced TDD with pytest, covering API contracts, ORM queries, and serializers, maintaining high test coverage across critical backend services.

Multiplier AI Solutions | Client: Apollo Hospitals

Software Developer

Apr 2020 – Jan 2022
Hyderabad, India

- Configured GitHub Actions CI/CD pipelines with Docker containerization and **Datadog** APM instrumentation, reducing deployment time by 40% and improving production incident detection across environments.
- Engineered an event-driven notification queue system with RBAC, enabling role-based alert routing across automated workflows.
- Built React and TypeScript UI modules, improving screen responsiveness by 20% through debouncing, throttling, and component level performance profiling.

CERTIFICATIONS AND AWARDS

NVIDIA AI RAG Developer Contest Winner, 2024 | AWS Certified Generative AI Engineer Associate, 2026 | AWS Certified Solutions Architect, 2021

KEY PROJECTS

HR Management Platform | Perky (Lincoln Financial Group) *Python, FastAPI, LangGraph, Kubernetes, React, TypeScript, AWS, Docker*

Built an enterprise HR benefits platform with an LLM-powered policy assistant enabling employee self-service query resolution and reducing HR support volume significantly. Designed for multi-tenant scale with RBAC enforcement, notifications, full audit trails, and compliance-grade workflows deployed across three AWS environments.

Financial Analytics Platform | Rapid Innovation (ICICI Home Finance) *Python, Django, Typescript, PostgreSQL, Redis, Docker, React, AWS*

Real-time financial analytics platform to monitor loan portfolio performance in real time across 25+ dashboards with automated document processing workflows. Contributed as the primary backend engineer owning API development, query performance tuning, and delivery pipeline setup by reducing dashboard load time by 75% and eliminating manual reporting bottlenecks for analyst teams.

TECHNICAL SKILLS

AI / GenAI: NLP, LangChain, LangGraph, RAG Pipelines, OpenAI Models, AWS Bedrock, Fine Tuning, MCP, Chroma DB, Ollama, Hugging Face, Agentic AI, Copilot, cursor, claude ai

Backend: Python, FastAPI, Django, GraphQL, REST APIs, JWT/OAuth, RBAC, PostgreSQL, Redis, API Contract Design, Kafka

Cloud/DevOps: AWS (EC2, S3, RDS, Bedrock, API Gateway), Docker, Kubernetes, GitLab CI/CD, GitHub Actions, Terraform, SRE Practices

Frontend: React.js, Next.js, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS, HTML5, WCAG 2.1 Accessibility

Testing: pytest, Jest, React Testing Library, Integration Testing, Regression Testing, Unit Testing

EDUCATION

Master of Science in Computer Science - Avila University | GPA: 3.63/4

Dec 2024

Bachelor of Engineering in Computer Engineering - Kakinada Institute of Engineering and Technology | GPA: 3.58/4

Mar 2020
